## NEOSHO NURSERIES COMPANY General Nurserymen and Orchardists NEOSHO, MISSOURI

OWNING AND OPERATING  
OVER 800 ACRES

### PRICE LIST—F. O. B. NEOSHO

September 5, 1925

**PRICES:** These prices are net f.o.b. Neosho, and are subject to stock being unsold when order is received. Transportation charges are paid by the purchaser upon receipt of the goods. If such charges were prepaid the prices would have to be higher.

**Prices on large quantities will be quoted on a definite list of varieties, with number, size and age required.**

**HOW TO FIGURE PRICES:** The rates apply only on varieties of the same kind or class. Any 5 apple and crabapple trees secures the 5 rate, but 2 apple and 2 peach and 1 cherry are charged at the each rate.

**PARCEL POST:** Shipments can be forwarded by prepaid Parcel Post if customer remits 20 per cent additional to cover postage. We will refund any difference between this and the actual postage. Trees over 4 feet tall cannot be sent by mail.

**INSPECTION:** Our nursery stock is inspected every year by state officials and every package bears their certificate of inspection. We also comply with the regulations of other states into which we ship.

**TERMS:** Cash with order, for immediate shipment, or 25% with order, balance C. O. D. If order is to be reserved for later shipment, send 10% deposit with order and balance before shipping date, or if preferred, send 25% with order, balance C. O. D. Nursery stock is perishable and cannot be held over another season.

**GUARANTEE:** We guarantee satisfaction upon arrival of stock. If a customer receives any stock that does not please him, we will replace it free of charge or refund the purchase price. The customer should notify us immediately upon arrival and inspection of the stock. Back of this guarantee is a Company with a paid-up capital of \$150,000.00. We own 200 acres in Phelps County, over 600 acres in Newton County, Missouri, and have every facility and equipment for growing, handling and packing nursery stock.

Our Brick Packing House in Neosho covers an area of 37,000 square feet and contains a refrigerating machine, which enables us to maintain the right degree of temperature necessary to keep stock in perfect condition.

**DATE OF SHIPMENT:** Nursery stock should not be dug until it is matured and dormant. This varies with season and different kinds of stock. Usually we begin shipping about October 25th and as late as May 10th. Peonies and Iris are ready September 1st.

**REPLACEMENTS:** These prices do not include any amount for replacing.

We cannot select your site or soil, prepare the ground, prune, plant, cultivate and supply water. The chief causes of failure are—exposure to drying winds or sun or to freezing when transplanting; failure to prune roots and tops; crowding into small holes cut in sod; failure to firm the soil closely about the roots; lack of cultivation.

**TRUE-TO-NAME:** The precautions and care we take in labeling our stock correctly is the best guarantee of truthness-to-name. If, however, any tree or plant should prove untrue to name it is agreed that we are not to be held liable for more than the purchase price or replacement without charge.

### BETTER VALUES IN FRUIT TREES

Many people judge the value of fruit trees by height.

If you order 3 to 4 ft. trees graded by height only, you may receive trees as small as your little finger or as large as your thumb.

After you transplant them, the tops must be cut back. What you have left makes the foundation of your orchard.

Obviously height is no measure of value. Nurserymen recognize this fact, for when they buy, the trees must be graded by diameter.

The planter gets better value when he buys fruit trees graded by diameter.

That's why our stock is sorted or graded by diameter measuring two inches above the collar or bud. The actual sizes are shown in the diagram at the right.

Experienced planters endorse our trees because they have sturdy trunks, excellent root systems and are full of vigor.

April 8, 1925

"I am glad to say that we have been fully satisfied with each shipment of trees received from you. Our planting this spring has been somewhat smaller than last year, but we have had in the neighborhood of three thousand trees from you and believe that we have a good idea of the stock you have to offer. We have been pleased with the strong healthy root system of all of these trees, and as we have selected the one year tops, we feel that we will have no trouble in establishing the particular form which we desire. The trees have been free from insect or disease pests, and being thrifty and vigorous, we expect to have 100 per cent of them well established in our orchards this season. We have no hesitancy in stating that we have never received better stock from any source, and have recommended that our friends take up their requirements with you."

D. E. LEWIS ORCHARD CO., Kansas City, Mo.

March 14, 1925

"The shipment of trees (1822 apple, 100 peach, 30 plum) that you sent out on Friday the 13th arrived in good time. The trees arrived in good condition and are now all planted. I have never received finer nursery stock." C. H. BIRD, Jeff Davis County, Texas

April 20, 1925

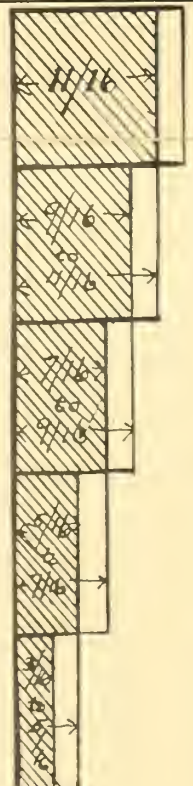

"Trees (330 apple, 350 peach, 4 plum) received in good condition, I consider them extra fine. Out of more than four thousand I have bought in the last five years I think them the best."

L. G. MARTIN, Franklin County, Illinois.

April 11, 1925

"The peach trees arrived in very good condition. I was much pleased with them. The whole transaction contributes to the fact that you have established a real true business policy."

ANDREW WALKER, Newport, Rhode Island.

Grimes Golden  
Triple-Life, Same  
price as 2 yr. apple

**TRIPLE-LIFE GRIMES GOLDEN**

Missouri State Experiment Station Bulletin No. 6 issued in 1920, says the Grimes Golden is frequently short-lived owing to the tendency of the bark on the lower part of the trunk to rot.

We know of orchards about 15 years old that are dying out because of this collar-rot. If top-worked trees had been planted, this trouble would have been avoided.

Our Triple-Life Grimes Golden are propagated by inserting the Grimes bud 12 to 18 inches above the ground in a variety that is not susceptible to this disease. The roots and lower 12 to 18 inches of the trunk are two years old and the Grimes part is one-year old. They are sold at the prices of two-year apple.

"You started a plan for me and you finished it. If you could hear the daily praise it would make you feel at least partially repaid for the extra trouble."

H. A. WANGERIEN, Santa Fe, N. Mexico.  
April 29, 1924.

(This refers to ornamental planting amount- ing to about \$200, for which we submitted plans.)

September 3, 1924.

"The shrubs and trees purchased of you three years ago are the best advertisement af any of the nurseries from which I purchased and my only regret has been that I ever sent an order to any other simply because you were a little farther away, as your superior packing, with quality of stock furnished, has not been equalled by any other."

FRED C. MERWIN, Pittsburgh, Pa.
